## 1.0 PREFACE

This is an interesting topic to many, including for non-believers; however it is also a difficult subject for an ordinary human (layman) to understand. This article makes an attempt to examine how the mind (spiritual field) of a human is utilized by the spiritual worlds, which have been existed before the creation of humans on the earth. Let us understand first: WHERE DOES THIS MIND EXIST IN OUR SYSTEM? Figure 1 presents an overall view of the human design by God Almighty. *Human has got two major distinctive systems, namely **physical** and **spiritual**.* The spiritual system is embedded into the physical system. However they have been well connected by two members; one from each system; *soul* from spiritual and *heart* from physical.

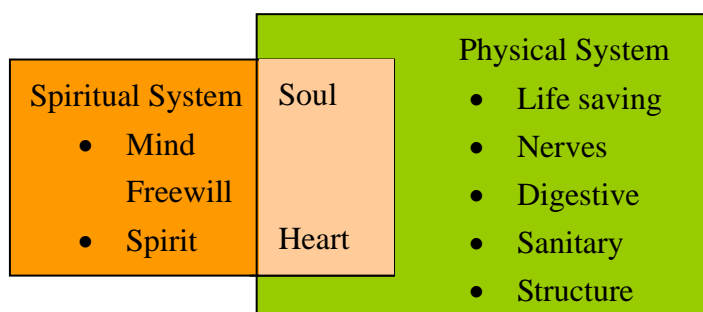

Figure 1: Human Design by God

Further these two major systems have got many sub-systems; indeed we have studied in detail about the physical system in our school science. This is possible for humans because the physical system is basically an observable one; so the observatory knowledge what humans possess have helped them to study for some extent the functional aspects of this system; *but not all the humans have the same capabilities; one has to really learn and spend more time to become knowledgeable; the level to which, we train our mind with the observed data will decide the human intelligent quotient or simply IQ.* **Physical is the slave system in human; the real master is our spiritual system.** The complete human life engine works on the system of commands, which are developed in the spiritual system. The physical system takes those developed commands (*here onwards we call them characters*) and performs accordingly. Therefore, it is worth investing some time to examine this spiritual system and study it carefully with the help of Wisdom of God (God's Word).

## 2.0 STRUCTURE OF SPIRITUAL SYSTEM

Figure 2 shows the elements of the spiritual system. It consists of mind (*field or processor*) and freewill (*authority or embedded code of conduct*), spirit (*life*) with a face

known as soul (*developer of characters*). The soul is the spiritual manifestation of God's image and each spiritual system is indeed identified by soul (*spiritual identity*). As our physical body does physical action, this spiritual body does spiritual action. *Feelings are basically spiritual actions or simply holy emotions*. The feelings may be body centered or spirit centered with respect to what command has been executed in the mind. Remember God almighty created human as a worshiper on the earth (**Exodus 23:25**). However the humans betrayed God and had become worldly. So their off-springs will have self induced spiritual feelings and pleasurable physical feelings through observatory knowledge and will not understand the wisdom of God naturally. That's why we have many faiths on this planet earth and we also have become fascinated to flesh related desires.

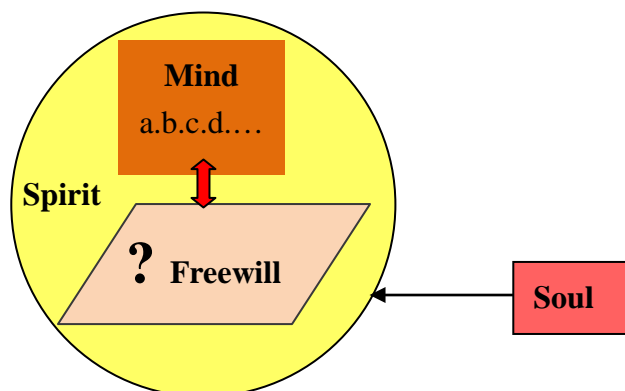

Figure 2: Structure of Spiritual System

The divine family has three major personalities, namely Father God (creator), Jesus Christ (savior) and Holy Spirit (provider). Similarly the spiritual system has three elements, namely soul, spirit and mind. The freewill is an embedded code of conduct, placed in the mind (*similar to an in-built operating system*). In contrast the physical system has many sub-systems; therefore God Almighty has designed the heart to control the complete physical system. Heart is the head of life saving system because the spirit of life dwells to and fro through breathing cycle with the help of lungs; heart functions because of breathing by receiving the required dynamic signal; breathing is possible as long as the spirit stays in our physical life saving system. Thus God has made this life saving system similar to the divine system. *Heart has the following: right lung (salvation or savior), left lung (protection or provider) and heart generate new physical energy (creation or creator)*. The impure blood enters the system through right lung and gets purified by oxygenation in left lung and the heart creates new life for the purified blood (cells) and pumps it to many parts of the body so that they perform. Here we must understand that the purified blood from left lung is in potential form as a source;

therefore heart beats (vibrates) and converts the blood of potential form into kinetic form to circulate it into the entire body according to the needs (frequencies). *Conversion of potential form to kinetic form is the creation of new life in the blood.* In the divine system, God Almighty is attached Himself with His Holy Spirit; similarly the heart is also attached to the left lung. We know that God speaks to different source and does the creation of life. Therefore it is so important to understand about heart. God Almighty has made the **life saving system** as part of the **spiritual system** during its stay in the physical domain (body). So, it is divine and is treated on par with other spiritual elements, namely mind (potential field to receive the wisdom of God) and freewill (authority to take decision), soul (developer of feelings or emotions that become characters). The spirit is the life and belongs to God Almighty.

### 3.0 SPIRITUAL GEOMETRY

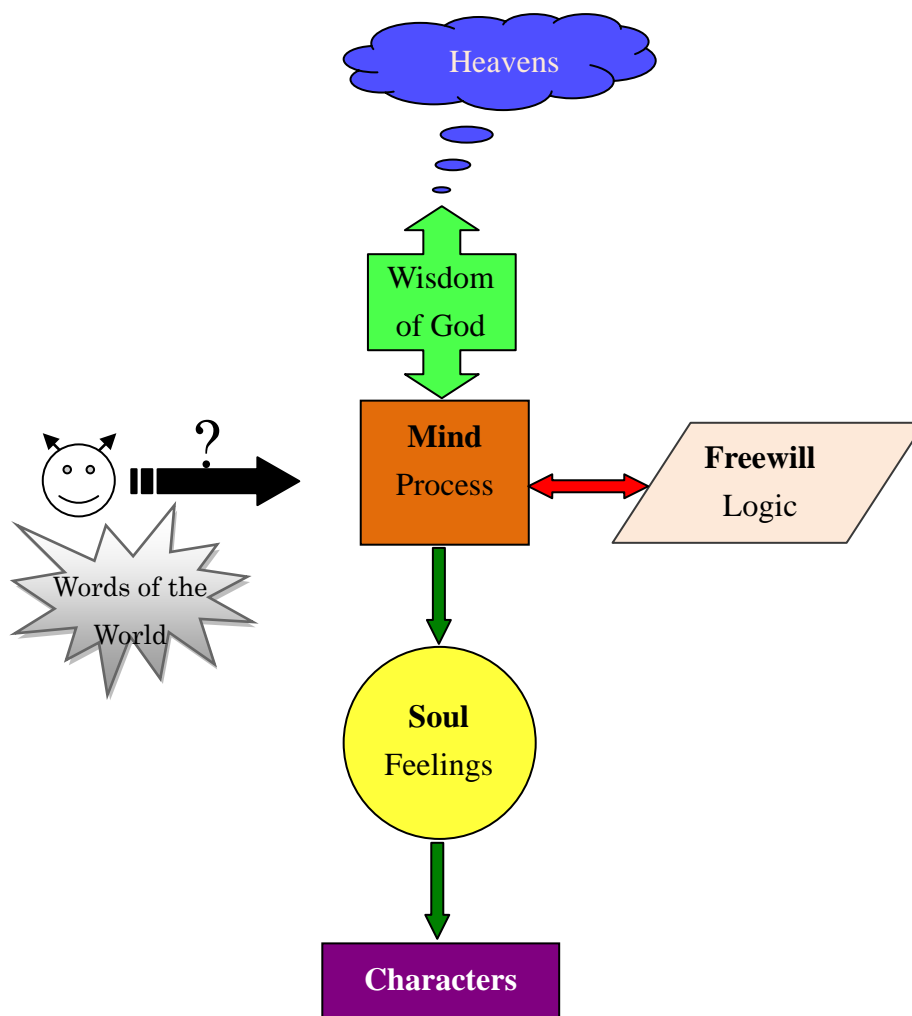

Figure 3: Spiritual Geometry

**Figure 3** presents the schematic view of spiritual geometry using which we can study how a thought process takes place in our life to develop a character and further how the developed character controls the entire system. In preface we have briefly discussed that there have been spiritual worlds existing before the creation of humans on the earth. The first one is the heavenly system of worlds where the creator (God Almighty) has been living and heading them; the other one is the cursed hell, where the enemy of God, Satan is living with his followers (fallen angels). The spiritual world headed by Father God is centered on righteous principles because the creator is the respecter of His principles. In contrast Satan has only one point agenda with him that is to twist every truth of God into unholy story and pervert the minds of humans; because he does not have any potential to create new lives or principles or new world; so he has decided to spoil the creatures and the principles of God for his survivability. Satan, the father of lies and his supporters (fallen angels) have only one advantage that is that they are spiritual personalities; that's why they could able to interact with our mind. However their future is declared and a righteous judgment has been already announced to them by God Almighty.

### **Mind**

It is represented by a square because mind gets an opportunity from all the sides equally, if it is kept open. Information enters mind through two ears and two eyes, representing the four sides and focusing on single dimension (refer to **figure 4**). The information is either related to eternal life or eternal death; either blessing or cursing; either peace or chaos; either faith or fear; either everlasting joy or seasonal pleasure; either salvation or seduction; either righteous or wicked; either holy or unholy; either spiritual relation or physical relation; either in light or in darkness. The one point agenda of Satan becomes active only if we permit it. That's why God Almighty has given the freewill that is code of conduct for us to screen the potential thoughts (seeds) for further processing.

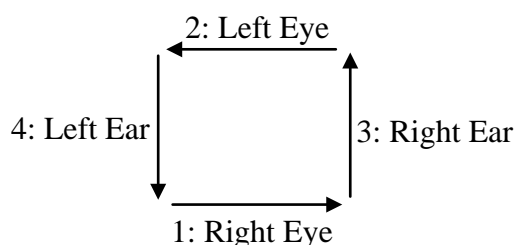

Figure 4: Input Organs to Mind

## Freewill

It is the logical element (*system of commands that help to code or encode*) and may be represented by a parallelogram; which side or way our mind must be directed is decided by our freewill. But to take a positive decision one needs to have knowledge that is tested already. God's principles are well proven and cannot be changed by anybody or in any circumstances. Remember God will never accept sins but can only forgive sinners and forget their sins, if they repent truthfully for what they have committed. In the beginning God had given His wisdom that is God's word to the first man; but he did not respect the principle of God and therefore selected lust over love. So he had lost the wisdom of God and decided solely moving his life with what he could observe naturally; the accumulated observations have formed the so called Sciences for humans later. Sciences are the observatory knowledge domains, developed by the humans over a period of 6000 years since the creation of life on the earth; they have been now classified by different names according to the field of specialization. These observatory knowledge bases, indeed humans have developed using the natural blessing of God. If we closely examine this very fact, we will definitely glorify our God Almighty. *Just think why God has created so many creatures in these three sources of human life: land, water and air. God has coded lots of knowledge into these creatures. Therefore, man who was supposed to subdue all these creatures will become a dependent on these perishable lives to search for knowledge (Genesis 1:26).*

God is being the source of wisdom always gives the best solution to any problem; that's why God created lives in all the three sources (water, earth, air), which man had to depend on, if he did not want to follow God. God distributed different physical principles and naturally gifted those into these lower creatures (of course humans later built them as theories); we have observed many creatures over a period of time and collected their life information and are still doing. *The beauty here is that man was created in the image of God with a mandate to rule these creatures; behold because of a wrong selection, his mind became vacuum and he had to see the nature and the creatures of lower standard than him to run his lustful life.* We should be thankful to God for His natural blessings. Unfortunately we have also spoiled that nature today. In this process we would see explicitly the wisdom of God working; but still we do not admire His high qualities and turn away from our wicked ways in order to respect His principles. God is waiting for us to repent for the choice we have made. If a person repents for his choice (obviously we have birthright over sin) and submit himself to God, then he gets the accessibility to the wisdom of God. **Certainly it does not mean to buy a**

**bible and keeping it along with other books.** One must read it regularly and meditate day and night; it means to live with the word of God and to have total agreement with the principles of God. With this paradigm shift the God's will becomes freewill in a believer's life and he is well protected.

### **Soul**

It is a life cycle as like a circle; though a single dimensional like a square, it has no sharp edges (smoothly move on once mind sends an image). Soul is a developer of feelings and feelings produce the characters. The characters are the commands which execute the various jobs in human (actions). Character has two dimensions; it is either good or bad; thus it is represented by rectangle. From the beginning soul starts moving in a specified direction and it has an origin; if it is spirit centered then the action will be spiritual otherwise body centered and that will lead to physical feeling. The movement of soul has to come to a halt, the moment the physical body attains its final state (death). But at this stage God decides whether to accept it or not, depending upon the state of its source, 'spirit' (either clean or unclean). If the soul is spiritual centered then it will be well trained to practice holy feelings that are the characters of heavenly creatures; such souls will be saved in Jesus Christ to get new life to live forever. But this must be done while being in physical life. The other souls with unclean spirits face judgment and go to their deserving place to stay forever in outer darkness where they will have weeping and gnashing.

## **4.0 IS MIND A BATTLE FIELD?**

We have clearly seen the various elements of spiritual system and their responsibilities. However we must study how this system works. In Scriptures, the mind is quoted as a field. Why is it defined as a field? In order to understand this, we must examine the characteristics of a field. The field is a continuous domain where seeds can be sowed and nurtured and will be permitted to grow to yield the harvest; the crops can be seasonal; but the field has the potential to start again another season for different crops because it has resources or capabilities to accommodate any type. Of course the field must have natural resources or we must provide the required minerals according to the type of crops. Now it is explicit why God almighty has called the mind as a field. Mind is a potential field to receive information from the sources; we have already seen that there are two kinds of sources every human has got. Therefore we have two routes. That also brings righteous judgment on us because the destinations of these two roots are different; one will end up in heavens and the other in hell of fire. Our first parents had wrongly chosen a route; but nearly 2000 years back God almighty had set right human

lives through a life saving scheme; in Jesus Christ the life of any sinner is saved.

Therefore it is very important to understand how the mind functions. The seeds that will be sown in the mind are the thoughts. Every thought has the potential to create an image (*imagination of something*); image is an executable command. Once an image is created or processed in mind, it will make the soul to develop a feeling for it; the feeling sets the nature for the image. This nature is the character; such images make a man to have characters. The characters decide the personality of a man. The word of God is the potential seeds based on righteous principles; if we permit such seeds into our mind; then it will create the image of God; then we will develop the characters like God (*likeness of God*). Unfortunately if a person permits a twisted or perverted form of truth from the world of darkness then he or she will develop the nature of Satan. Why do we say the seeds of Satan are twisted or in perverted form? In the beginning there was word and it was with God and it was God. That means the source of word is God.

**Then how do we have so many bad words in the world; in different languages.**

We know that Lucifer was an anointed son of God in heavens; he was a worship leader; therefore was given spirits of wisdom, riches and majesty. However because of his beauty and riches, he used his wisdom to reasoning his personality and lifted up his heart to a level of God. That had brought an end to his stay in heavens; God has cast him to the ground (earth). Since he had lost all the anointed gifts, he could not think righteous way anymore; so his mind naturally perverts the truth of God; that is the path of wickedness. Since he is not the creator, he cannot develop new principles; therefore *perversion is the basic mode of operation using which he started his kingdom* on the earth by cheating our first mother. Over a period of time, he has plenty of such thoughts developed and stored in his treasure. He used the demons, the fallen angelic creatures as the source of media and human minds as potential fields to develop such thoughts, images and characters. Almost all the possible wicked images he has developed are with the help of humans and demons. *Every child has to face this very fact of life on the earth till judgment; there is no escape.* The wicked thoughts will try to enter the mind in the form of suggestions first; if permission is given then it will start dragging the spiritual system towards darkness because the mind and soul work together on a seed that is potential to spoil the spiritual body.

If the thought process begins with a bad seed, mostly it is a body centered (Satan will suggest through lies that seasonal pleasure is very important). Then the mind will take

such person into the virtual world. Everything will appear colorful; virtual characters will be built on imagination. Now Satan will alienate that person from the society by seeking either isolation (look for darkness) or recognition (caste/religion/color/region etc) or identity (self-pride). But the end result is worldly life, followed by physical death; finally face the wrath of God, which is to receive eternal death in hell of fire. On the other hand, if the person repents for his mistakes and submits himself to God during this life; God receives such person through Jesus by His grace and mercy. Christ Jesus guides such person through Holy Spirit and seeds the wisdom of heaven in the mind; subsequently writes it in the heart. Through faith then the person will practice the principles of God in everyday life. Consistently following God's word guarantees eternal life to the imperishable spiritual system (soul and spirit) after physical death. Those who stay till the end of their physical life in total agreement with God will be in heavens as appointed worshipers in the ministry of worship and service, headed by our Lord Jesus Christ. *The beauty of the soul is reflected through its characters*; but the origin is the thought seeded in mind. We must worship God the creator through Jesus Christ with our full mind, full heart and full soul, so that He will bless us with His Holy Spirit, who will seed God's word in our mind to make the life blossom.

Mind is a field; but there are three kinds;

- **Natural Man:** *Pleasure field*

He believes that the world has everything for his life; makes no attempt to learn about true God; therefore follows some false worship according to his convenient; either he will create on his own or align with like minded people.

- **Carnal Man:** *Battle field*

He accepts Christ Jesus as savior in his life; but unable to stay in God's principles due to temptations and likings in world affairs; this is due to lack of spiritual faith and knowledge of God. No one can serve God and world simultaneously. God performs duties based on His unchangeable principles; but this world has passionate desires. Spiritual world is deterministic but the physical world is non-deterministic. Thus the mind of carnal man is a battle field. He will never attain a peaceful state of mind unless stops sinning.

- **Spiritual Man:** *Peaceful field*

He is with God Almighty; his mind is peaceful because he has received the peace from Jesus Christ, who has already won the battle field.

**If Holy Spirit (True God) operates a human mind then it will be a peaceful field.**

Amen

Praise the Lord
